

APSCVIR2024: Scientific Program

3 May 2024

Date	Time - Start	Time - End	Duration (min)	Convention Centre A	Lotus Suite 1-4	Lotus Suite 5-7	Convention Centre B	IR Theatre		
03 May 2024	08:15	09:00	45	No Session <i>No topic</i>	No Session <i>No topic</i>	SP: Redefining Precision in Image Guided Procedures: A Flexible Angio System in Daily IR Practice <i>No topic</i>	YIR: 8 Minutes Review for Young IR (Embolotherapy) - Basic Concept of Embolization of Visceral Aneurysm - Endoleak Type II: Now and Then - Varicocele Embolization: Step by Step - Concept of Lymphatic Embolization - Hit the Right Target in Vascular Malformation - Q&A	No Session <i>No topic</i>		
	09:00	10:30	90	IO: Strongholds of Interventional Oncology - Chronological Development of Interventional Oncology in Asia-Pacific - Current Selections of Imaging Guidance: How to Make the Most Out of Them - Hepatic Arteriography: Exploring Anatomical Details and Practical Insights - Ultraslective TACE: Concept, Evidence, and Standardization - How We Can Achieve Better Survival Outcome and Tumor Response in Transarterial Therapies for HCC	HD: Central Vein - What is the Better Option to Prolong Patency of Cephalic Arch Lesion? - DCB or Stent for Central Vein Obstruction: Which One is Better? - Tips and tricks of Sharp Needle Recanalisation of CVO - Radiofrequency Guidewire in Chronic CVO - Unusual Route for Tunneled Hemodialysis Catheter: How I Do? - Q&A	PAD: Aortic Intervention - Complex Thoracic EVAR - Fenestrated vs Branch Endografts - Update in Acute Type B Aortic Dissection - Challenging Aortic Neck, Option for the Treatment - Internal Iliac Embolization versus IBD: What is the Evidence? - Tips and Trick in Management of Type II Endoleak after EVAR - Q&A	EMB: New Frontier of Embolotherapy - Next Generation Embolic Agents - Front Row Interventional Radiologist in Trauma Setting - Thyroid Artery Embolization for Multinodular Goitre - Update technique on Embolization for Pulmonary Arteriovenous Malformations - Transjugular insertion of biliary stent in patients with malignant biliary obstruction - Q&A	SS: Oral Presentation 1 <i>No topic</i>		
	10:30	11:00	30	Break						
	11:00	11:30	30	Opening Ceremony						
	11:30	12:30	60	Honorary Lectures: Nara Vaeusorn						
	12:30	14:00	90	- The Future of Independent Interventional Radiology Services: A Roadmap to Success LS: Merit - Opening Remark - How to Equip Wireless Cannulation for Beginners - Tips and Trick in Wireless Technique: Case Sharing - Q&A	LS: Boston: Renal Ablation <i>No topic</i>	LS: GE <i>No topic</i>	LS: Argon <i>No topic</i>	No Session <i>No topic</i>		
	14:00	15:30	90	PAD: Practical Point in Peripheral Interventions - Endovascular Technique for Challenging Subset of AIOD - Advancements in Endovascular Therapy: Drug-Eluting Stents and Drug-Coated Balloons for Below-the-Knee Interventions - Limb Salvage in BTK Angioplasty- Factors Influencing Success and Failure - Impact of IVUS on Femoropopliteal Artery Endovascular Interventions - Does the Sirolimus Technology Change the CLTI Strategy? - Q&A	APSCVIR Meets SIR - The Space Between: Closing the Gap in Guidelines for IR Ablation for Colorectal Cancer Liver Metastasis and Evolution of Margins - Challenges and Opportunities in Practicing Radioembolization in Asia - TBA - Comparing Interventional Radiology Training: USA vs. Asia – The Good, the Bad, and the Enlightening! - Q&A	IO: Expanding Practice of Interventional Oncology - Key to Success in Combine Treatment of Hepatocellular Carcinoma - Challenging Cases of Hepatic Tumor Ablation - Liver Ablation in Next Decade - Immunotherapy and Interventional Oncology. What Does Literature Says - Interventional Radiologist Role in Palliative Care - Q&A	SP: State of the Art with Radial Approach in HCC - Introduction - Tools of the trade and techniques for successful access - Role of radial access and transformative impact on TACE - Integration of ultraslective TACE and radial access - Combining radial TARE with other therapies - Complications management and enhancing patient safety - Panel Discussion: Radial Dialogue	SS: Oral Presentation 2 <i>No topic</i>		
	15:30	16:00	30	Break						
	16:00	17:30	90	Misc: Emerging Technology Enhancing IR - Endovascular Denervation in Treating Type 2 Diabetes Mellitus: a New Field of Interventional Radiology - Advancements in Interventional Radiology: Embracing AI, Precision Techniques, and Personalized Therapies - Artificial Intelligence in IR - Artificial Intelligence implementation in a large US academic Radiology Department, and what about IR? - Endoleak using time-resolved CT angiography with Area...	NV: Head and Neck Intervention - Essential Anatomy for Thyroid Ablation - Thyroid Nodule: FNA versus Biopsy for Tissue Diagnosis - Microwave ablation for Benign Thyroid Nodules - Optimizing the Technique - Thyroid Thermal Ablation: Starting or Relief Pitcher in Future Cancer Management - Parathyroid Ablation - Where We Do Stand? - Q&A	EMB: Women Intervention - Obstetric Haemorrhage: How Can We Help? - Utero-ovarian Collaterals: How to Deal with Them During UAE? - UAE and Fertility: What Do We Know? - Pelvic Congestion Syndrome: A Keep-it-simple Approach - Challenging Fibroid and Adenomyosis Cases: How Can We Manage - Panel Discussion: Controversial Issues	SP: Philips <i>No topic</i>	SS: Oral Presentation 3 <i>No topic</i>		
	17:30	18:00	30	No Session <i>No topic</i>	No Session <i>No topic</i>	No Session <i>No topic</i>	No Session <i>No topic</i>	No Session <i>No topic</i>		

APSCVIR2024: Scientific Program

4 May 2024

Date	Time - Start	Time - End	Duration (min)	Convention Centre A	Lotus Suite 1-4	Lotus Suite 5-7	Convention Centre B	IR Theatre	
04 May 2024	08:15	09:00	45	EMB: MSK clinic - Basic concept of TAME - MSK embolization in Thailand: Experience sharing - Road to success: MSK embolization clinic	SP: Penumbra - Introduction - PE response Team and the Interventional Radiologist - Computer Assisted Vacuum Technology: Changi General Hospital Experience - Q and A	SP: Roche - Opening and Introduction - Optimal Role of Immunotherapy Combination in Intermediate to Advanced Stage of HCC - Complications of Percutaneous Transhepatic Cholangioscopy and Lithotripsy - Hepaticolithiasis Post Hepaticojejunostomy- Role of Percutaneous Jejunal Access - Q&A	YIR: 8 Minutes Review for Young IR (GI intervention) - Embolic Material for GI Bleeding - Knows the Anatomy of Gastric Varices - PARTO Concept - Concept of Biliary Drainage - Embolic Material in Portal Vein Embolization Review - Q&A	No Session No topic	
	09:00	10:30	90	HD: Hemodialysis Access - Endovascular Management of Immature AVF - Role of Ultra High Pressure in AVF - Stent in Hemodialysis Access: Which One is the Best? - EndoAVF - Failed Experiment or A Game Changer? - Endovascular Salvage of Access Thrombosis - Q&A	APSCVIR Meets CIRSE - CIRSE Introduction and Vision for IR - How to Treat Best In-stent Restenosis: Options and Outcomes - Double Vein Embolization Before Extensive Liver Surgery : Technical Tips - The Paclitaxel controversy: Up the hill and down again - Curriculum Driven Learning and Certification in IR (EBIR) - Q&A - Advancing Interventional Oncology Services Globally (IASIOS) - Ablation of Pulmonary Metastasis: Tips and Tricks? - Q&A	NV: Biliary Intervention - Malignant Biliary Stricture - What IR Can Offer? - Complex Biliary Intervention Beyond the Drainage - Benign Biliary Stricture - What IR Can Offer? - Complications of Percutaneous Transhepatic Cholangioscopy and Lithotripsy - Hepaticolithiasis Post Hepaticojejunostomy- Role of Percutaneous Jejunal Access - Q&A	SP: Advanced Imaging Navigate Liver Cancer Treatment (Bayer) - Hepatocarcinogenesis with LIRADs correlation - MRI Imaging features of histopathology subtype of HCC - Personalized the management for early HCC: choose the right weapon - Treatment response evaluation and patient monitoring after ablation - Panel Discussion	SP: Think UFE Forum - Opening Remark - Which Embolics for UFE? - Reaching out to the Patients - My Personal Journey - My UFE Practice and the Evidence Behind - Panel Discussion and Closing Remark	
	10:30	11:00	30	Break					
	11:00	12:30	90	PED: Pediatric Intervention: IR Toolkits for KIDS - Biopsy in Pediatrics: What's the Challenge? - Pediatrics Biliary Intervention: Biliary Atresia and Liver Transplantation - Renal Artery Stenosis in Children: Diagnosis and Intervention - Lymphatic Intervention in Children: We Can Do It! - Central Venous Catheter Insertion in Central Venous Stenosis and Alternative Pathways - Q&A	APSCVIR Meets SIO - Future Directions for Radioembolization - Ablative SIRT in Massive Hepatocellular Carcinoma - Thrombectomy and PE intervention in the cancer patient - Navigating the Currents: Lymphatics Intervention in the Oncology Patients - CT guided Prostate Ablation: Made easy - Q&A	INR: Update Mechanical Thrombectomy - Large Core Infarct: New Trend of Mechanical Thrombectomy - Rescue Treatment Beyond Conventional Thrombectomy - Difficult Cases of Acute Posterior Circulation Stroke - Endovascular Treatment of Stroke: Experience from Vietnam - Radial Access for Neurovascular Procedures: Tips and Tricks - Q&A	SP: MSK Intervention Current and Future - MSK embolization: New Standard of Care in Arthritis - Embolic Material of Choice in MSK Embolization - Ablation in Benign Bone Tumor: Heat vs Cold - Ablation and Augmentation in Spinal Metastasis - Painful Bone Metastasis: How to Improve Quality of Life - Q&A	SP: Think PAE Forum - Opening Remark - Challenging PAE Case Management - TRA in PAE - How to Avoid PAE Complication - Panel Discussion and Closing Remark	
	12:30	14:00	90	LS: Radial to Anywhere: The New Frontier in Interventional Radiology - Introduction - Transradial access for renal intervention - The novel approaches in bronchial artery embolization - Showcase the potential of MSK interventions via radial access - Radial access: A game change in prostate and uterine fibroid embolization - Summary, Q&A	LS: Medtronic: Emprint No topic	LS: Unlocking the Potential of High Definition (Hi-Def) Imaging in IR - Pushing the Boundaries: High-Definition Imaging for Next-Generation Interventional Techniques - High Definition Imaging: Make the invisible visible - Advancements in Interventional Radiology: Precise Techniques with Canon Angio-CT System	No Session No topic	No Session No topic	
	14:00	15:30	90	PAD: CLTI - Management of Complex Calcified Lesions - Debulking Atherectomy in Peripheral Arteries - Drug-Coated Technology for Complex Femoropopliteal Lesion - Endovascular Treatment of In-stent Stenosis - Update on Crossing: Trick for Uncrossable Lesions - Q&A	INR: Hemorrhagic Stroke and H&N Embolization - Role of Flow-diverter Stent in the Acutely Ruptured Aneurysm - Role of Flow-diverter Stent in the Acutely Ruptured Aneurysm - Intra-arterial Chemotherapy for Retinoblastoma: Our First Year Experience in Indonesia - Endovascular Treatment for Carotid Blowout - Head and Neck Vascular Trauma - Q&A	PED: Vascular Anomaly: Meet the Experts - ISSVA Classification: Are We There Yet? - Low Flow Malformation: Let's Talk About Regimens - Applications of Yakes Classification to Treat Arteriovenous Malformation - Pediatric Combined Vascular Malformation and Syndromes: Diagnosis and Treatment - Cryoablation and Other Ablation Methods in Vascular Malformation - Q&A	SP: New Update on TACE (Piolax) - Balloon-Occluded TACE - Advanced Forehand Accesses for TACE: Your Secret Sauce for Success - PIOLAX Emulsion Connector— Multi-Center Study in Japan - Standardization of TACE: Why and How Interventional Radiologists Respond to the Need for Consistent and Stable Emulsion - Initial Experience of Using PIOLAX Emulsion Connector in Thailand - Q&A	Misc: Scientific Writing Skill Enhancement Program - Introduction to the session - CVIR presentation - IMRAD structure - How to Respond to Reviewers - Dummy Paper Review by Bien Soo Tan, Gerard Goh, John Kaufman, Stefan Muller-Hulsbeck - Closing Remark	
	15:30	16:00	30	Break					
	16:00	17:30	90	Room Preparation No topic	VN: DVT and PE - Thrombectomy and PE Intervention in the Cancer Patient - CT Lung Perfusion in IR Management of Acute Pulmonary Embolism - Acute Pulmonary Embolism: Role of Mechanical Thrombectomy - MDT Approach for Optimal Management Pulmonary Embolism - IVC Filter: Please Do It Properly - Q&A	EMB: Lymphatic Intervention - Lymphatic Intervention - Understanding Problems and Treatment Planning - Thoracic Duct Embolization - How I Do It? (VDO Demonstration) - IR Roles in Nontraumatic Chylothorax - Hepatic Lymphorrhoea: Shall We Embolization? - Advancements in Percutaneous Interventional Treatment of Chyluria - Q&A	SP: Radioembolization in All Aspect (Sirtex) - Introduction of Y-90 - Y-90 in Early-Stage HCC - Y-90 in Intermediate-Stage HCC - Y-90 in Advanced-Stage HCC - Y-90 in Non-HCC Hepatic Tumors - Advanced Techniques in Y-90 Planning and Treatment - Panel Discussion	Misc: Survival Guide for Radiographer - Radiation Dose Reduction Protocol in Angiography - Fusion US Workflow: Let's Hit the Target - CT Fluoroscopy: Faster and Better - Development and Evaluation of Radioactive Waste Shielding Containers for Transarterial Radioembolization - Q & A	
	17:30	18:00	30	Room Preparation No topic	No Session No topic	SP: Medfocus: Prostate Ablation - Focal Treatment for Intermediate-Risk Prostate Cancer - Irreversible Electroporation of Prostate Cancer: How to Perform?	No Session No topic	No Session No topic	

APSCVIR2024: Scientific Program

5 May 2024

Date	Time - Start	Time - End	Duration (min)	Convention Centre A	Lotus Suite 1-4	Lotus Suite 5-7	Convention Centre B	IR Theatre
05 May 2024	08:15	09:00	45	No Session No topic	BM: APSCVIR EC Meeting No topic	SP: C-TACE Evolution Through Decades - Understanding Vascular Supply of HCC: The Way to Achieve Complete Response - Practical Technique in Superselective TACE - Challenging Case for TACE - Q&A	YIR: 8 Minutes Review for Young IR (Non-Vas) - Percutaneous lung biopsy: How to perform safely - Kidney biopsy for parenchymal disease - Percutaneous nephrostomy tip and trick - Lymphocele sclerosing treatment - Percutaneous Gastostomy insertion step by step - Q&A	Misc: How to Start IR Service in Limited Resource - When You Are Entrepreneur Interventional Radiologist - How to Manage Resource Wisely? - Panel Discussion
	09:00	10:30	90	IO: Advanced Transcatheter Therapies of Hepatic Malignancies - TACE for Cholangiocarcinoma - HCC: Early Combination Therapies versus Stepwise Therapies - Transarterial Chemosaturation for Liver Metastases - HCC: Update Landmark Trials and What is Ongoing - Feasibility and Clinical Usefulness of Triaxial Microcatheter System - Q&A	BM: APSCVIR AGM (General Meeting) No topic	Misc: All about transplantation - Doppler Ultrasound Surveillance for Liver Transplantation - Hepatic Venous Outflow Obstruction After Adult Living Donor Liver Transplantation - Post Pediatric LDLT Biliary Strictures: IR Management - Trouble Shooting in Hepatic Artery Complication After Liver Transplantation - Percutaneous Angioplasty of Portal Vein Stenosis - Q&A	IO: Ablation for Non Hepatic Tumor - Ablation of Breast Benign Lesion - Ablation of Early Stage Breast Cancer - Ablation of Uterine Fibroid - Ablation of Endometriosis - Ablation of Ectopic Parathyroid Adenoma - Q&A	Misc: Clinical Care in IR - How to Use Preoperative Antibiotics Properly? - A Day in the Life: Vascular Access Nurse - Precaution Drug (antiplatelet, anticoagulant, else) before IR Procedure - Safe Sedation: Knows Your Limit - Nurses Roles and Responsibilities in Placement of PICC in Paeds - Q&A
	10:30	11:00	30			Break		
	11:00	12:30	90	VN: Variceal Hemorrhage Control - IR Role in Acute Portomesenteric Thrombosis (Cirrhotic and Non-cirrhotic) - Portal Vein Recanalization and Stenting - CARTO vs PARTO for Gastric Variceal Treatment - TIPS and TRICKS for TIPS - TIPS in Budd Chiari Syndrome: Yes for Conventional Technique - Q&A	Misc: Lesson Learned IR case part I - Case 1: - Case 2: - Case 3: - Case 4: - Case 5: - Case 6:	APSCVIR Meets CCI - the application of irradiation stent in treating malignant biliary stricture - Surgical Ligation versus Endovascular Embolization for Type II Congenital Extrahepatic Portosystemic Shunt - Treatment of Advanced Hepatocellular Carcinoma with Hepatic Arterial Infusion Chemotherapy and Immune Checkpoint Inhibitors - Endovascular Recanalization on Symptomatic Non-acute Intracranial Occlusion - Q&A	SP: Maximizing the Potential of Angio-CT: Exploring New Frontiers Beyond TACE (Canon) - Taste of Honey: Hepatobiliary & Gastrointestinal IRs on Angio-CT - Cryoablation of Renal Tumors: Optimizing Clinical Outcomes with 4DCT - Expanding IR/IO Horizon Using Hybrid Angio-CT System - Trauma and Emergency Care in Angio-CT Room - Type II Endoleak Embolization Using Angio-CT - Panel Discussion - Panel Discussion - Q&A	Misc: Short Talk: IR team - How to Communicate with Patients: Handling Unexpected Situation - How to Setup Outpatient Clinics - How to Use Social Media in IR Business - How to Build a Successful Team - Burn Out Syndrome: What should we do? - Panel Discussion
	12:30	14:00	90	LS: Philips No topic	LS: Medtronic: Onyx - Onyx LES: Principle of Action, Tips & Tricks - Case Sharing: Onyx in Type II Endoleak - Case Sharing: Concerto	No Session No topic	No Session No topic	No Session No topic
	14:00	15:30	90	IR Quiz No topic	Misc: Lesson Learned IR case part II - Case 1: - Case 2: - Case 3: - Case 4: - Case 5: - Case 6:	Misc: Sustainable IR - Data Driven Sustainability - Direct IR training pathway: How to make it success - IASIOS: The Way of Sustainable IR - Panel Discussion	No Session No topic	No Session No topic
15:30	16:00	30			Closing Ceremony
